

Hydrogen

A periodic table of elements with the element Hydrogen (H) highlighted in the top-left cell. The symbol 'H' is also printed in a large font in the center of the table.

Helium

A periodic table of elements with the element Helium (He) highlighted in the top-right cell. The symbol 'He' is also printed in a large font in the center of the table.

Lithium

A periodic table of elements with the element Lithium (Li) highlighted in the second cell of the first row. The symbol 'Li' is also printed in a large font in the center of the table.

Beryllium

Be

A periodic table of elements with the element Beryllium (Be) highlighted in the second column, second row. The symbol 'Be' is placed in the top right corner of the table.

Boron

B

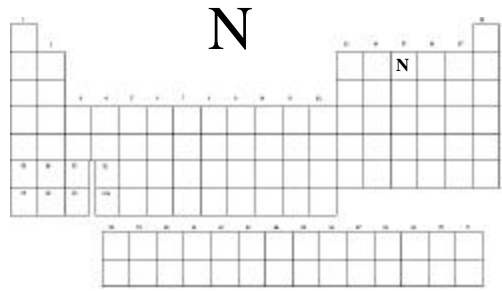

A periodic table of elements with the element Boron (B) highlighted in the third column, second row. The symbol 'B' is placed in the top right corner of the table.

Carbon

C

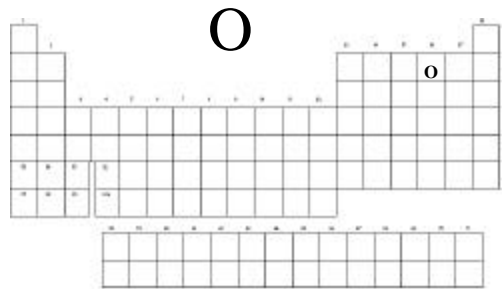

A periodic table of elements with the element Carbon (C) highlighted in the fourth column, second row. The symbol 'C' is placed in the top right corner of the table.

Nitrogen

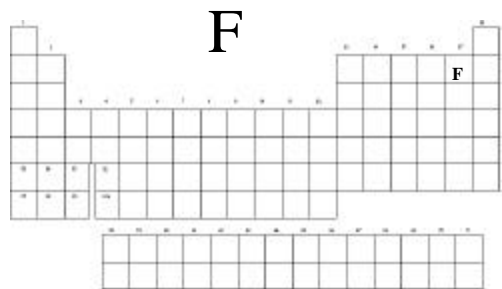

A periodic table of elements with the element Nitrogen (N) highlighted in a light blue color. The element is located in the second period, fifteenth group.

Oxygen

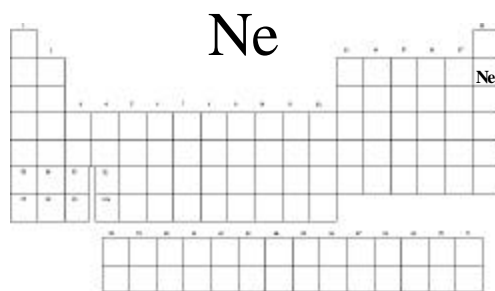

A periodic table of elements with the element Oxygen (O) highlighted in a light blue color. The element is located in the second period, sixteenth group.

Fluorine

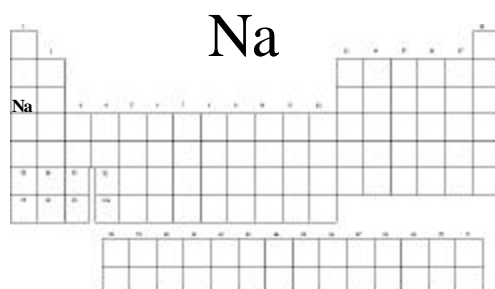

A periodic table of elements with the element Fluorine (F) highlighted in a light blue color. The element is located in the second period, seventeenth group.

Neon

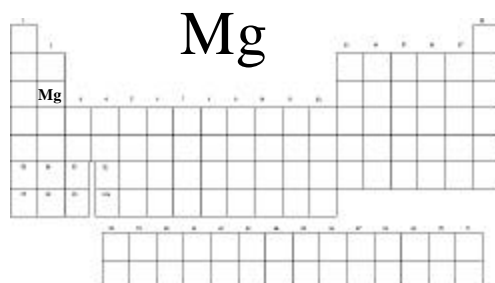

A periodic table of elements with the element Neon (Ne) highlighted in a light gray color. The symbol 'Ne' is written in a large font above the table, and a smaller 'Ne' is placed in the cell corresponding to Neon in the noble gas column.

Sodium

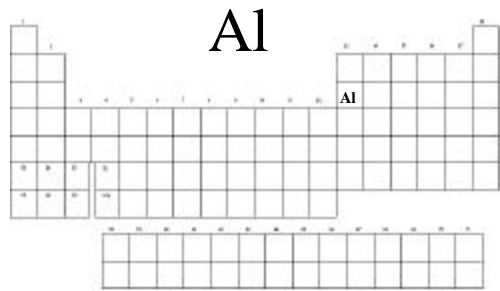

A periodic table of elements with the element Sodium (Na) highlighted in a light gray color. The symbol 'Na' is written in a large font above the table, and a smaller 'Na' is placed in the cell corresponding to Sodium in the first column.

Magnesium

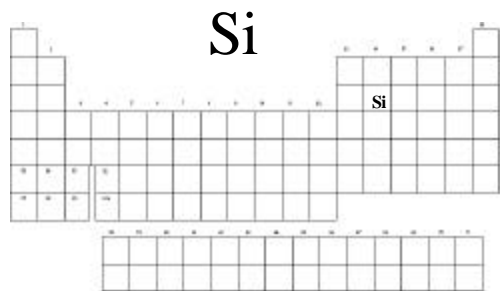

A periodic table of elements with the element Magnesium (Mg) highlighted in a light gray color. The symbol 'Mg' is written in a large font above the table, and a smaller 'Mg' is placed in the cell corresponding to Magnesium in the second column.

Aluminum

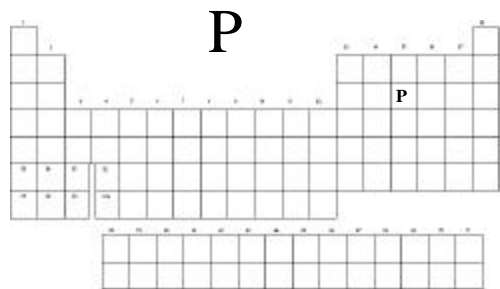

A periodic table of elements with the element Aluminum (Al) highlighted in a light gray color. The symbol 'Al' is printed in a large font above the element's position in the periodic table.

Silicon

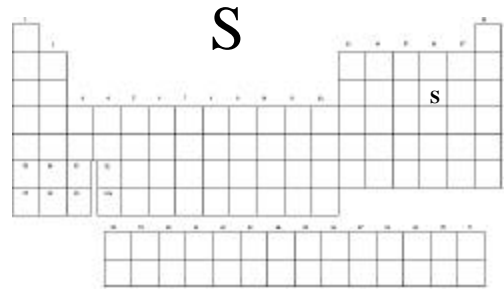

A periodic table of elements with the element Silicon (Si) highlighted in a light gray color. The symbol 'Si' is printed in a large font above the element's position in the periodic table.

Phosphorus

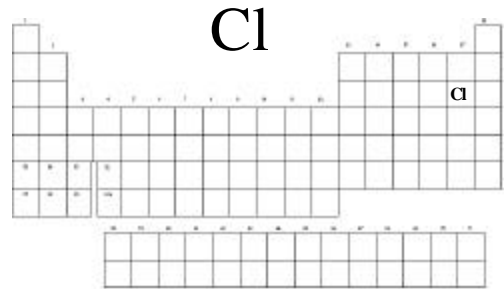

A periodic table of elements with the element Phosphorus (P) highlighted in a light gray color. The symbol 'P' is printed in a large font above the element's position in the periodic table.

Sulfur

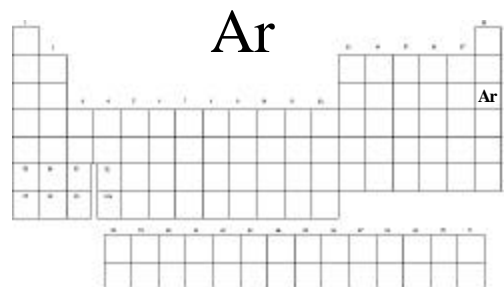

A periodic table of elements with the element Sulfur (S) highlighted in a light gray color. The element is located in the third period, sixteenth group.

Chlorine

A periodic table of elements with the element Chlorine (Cl) highlighted in a light gray color. The element is located in the third period, seventeenth group.

Argon

A periodic table of elements with the element Argon (Ar) highlighted in a light gray color. The element is located in the third period, eighteenth group.

Potassium

A periodic table of elements with the element Potassium (K) highlighted in a light gray color. The symbol 'K' is also printed in a large font above the table.

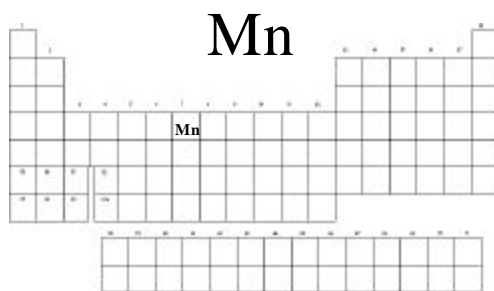

Calcium

A periodic table of elements with the element Calcium (Ca) highlighted in a light gray color. The symbol 'Ca' is also printed in a large font above the table.

Chromium

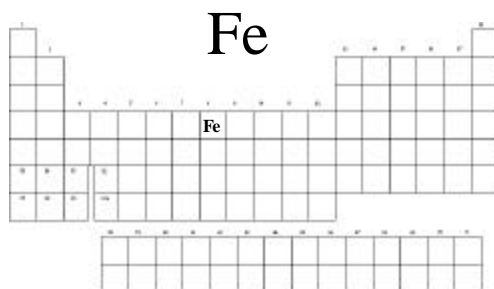

A periodic table of elements with the element Chromium (Cr) highlighted in a light gray color. The symbol 'Cr' is also printed in a large font above the table.

Manganese

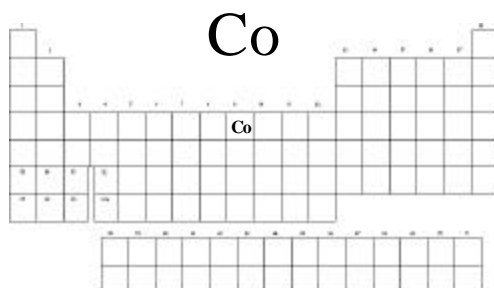

A periodic table of elements with the element Manganese (Mn) highlighted. The symbol 'Mn' is placed in the cell for Manganese, which is located in the 7th period and 7th group of the periodic table.

Iron

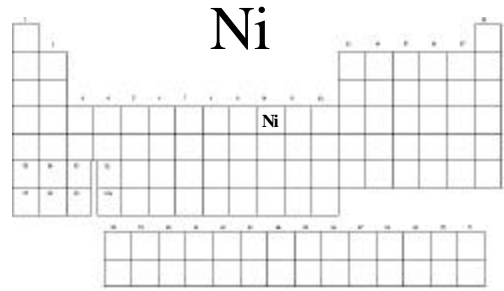

A periodic table of elements with the element Iron (Fe) highlighted. The symbol 'Fe' is placed in the cell for Iron, which is located in the 4th period and 8th group of the periodic table.

Cobalt

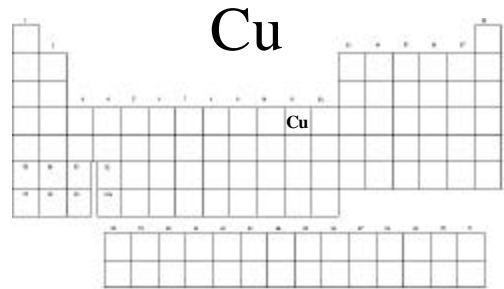

A periodic table of elements with the element Cobalt (Co) highlighted. The symbol 'Co' is placed in the cell for Cobalt, which is located in the 4th period and 9th group of the periodic table.

Nickel

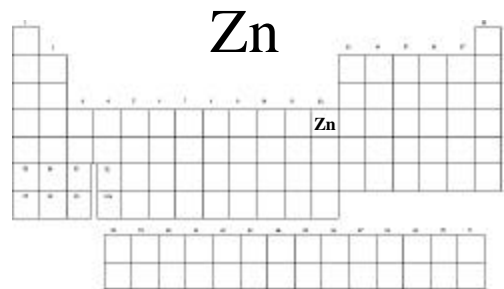

A periodic table of elements with the element Nickel (Ni) highlighted in a light gray color. The symbol 'Ni' is printed in a large font above the table, and a smaller 'Ni' is placed inside the highlighted cell for Nickel.

Copper

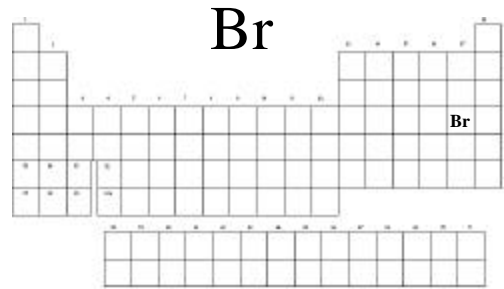

A periodic table of elements with the element Copper (Cu) highlighted in a light gray color. The symbol 'Cu' is printed in a large font above the table, and a smaller 'Cu' is placed inside the highlighted cell for Copper.

Zinc

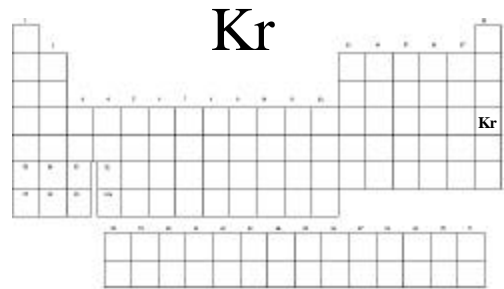

A periodic table of elements with the element Zinc (Zn) highlighted in a light gray color. The symbol 'Zn' is printed in a large font above the table, and a smaller 'Zn' is placed inside the highlighted cell for Zinc.

Bromine

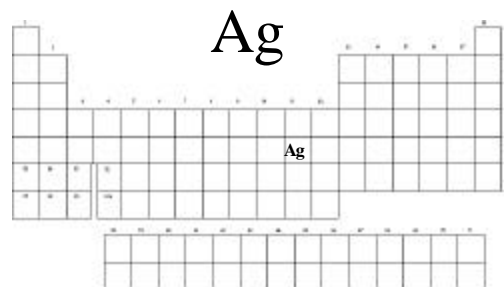

A periodic table of elements with the element Bromine (Br) highlighted in a light gray color. The symbol 'Br' is also printed in a large font above the table.

Krypton

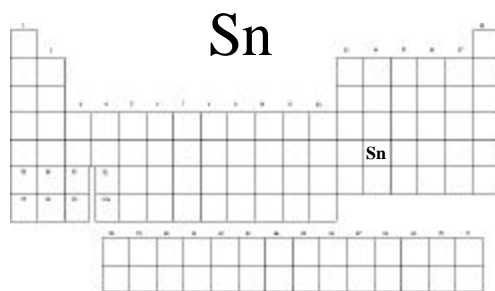

A periodic table of elements with the element Krypton (Kr) highlighted in a light gray color. The symbol 'Kr' is also printed in a large font above the table.

Silver

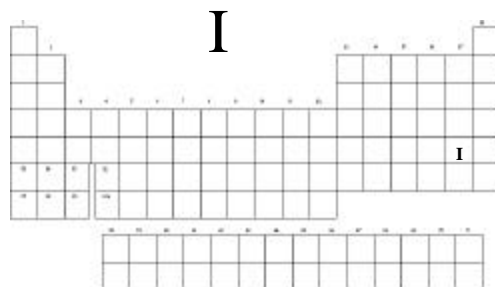

A periodic table of elements with the element Silver (Ag) highlighted in a light gray color. The symbol 'Ag' is also printed in a large font above the table.

Tin

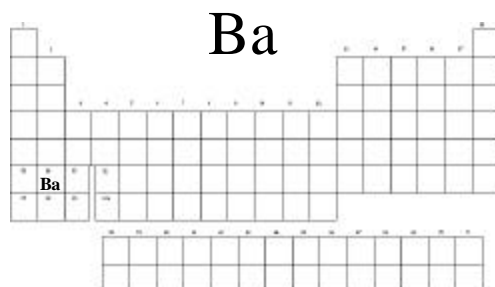

A periodic table of elements with the element Tin (Sn) highlighted in a light gray color. The element symbol 'Sn' is printed in the center of the highlighted cell.

Iodine

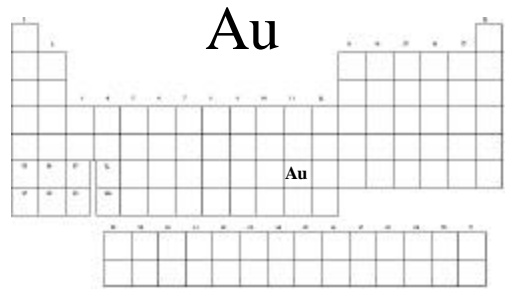

A periodic table of elements with the element Iodine (I) highlighted in a light gray color. The element symbol 'I' is printed in the center of the highlighted cell.

Barium

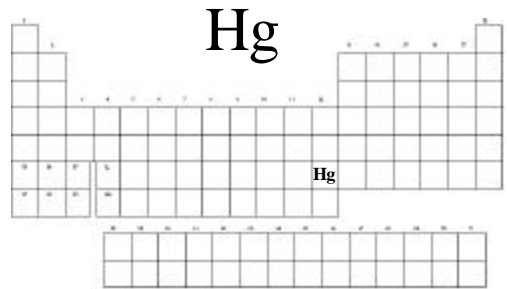

A periodic table of elements with the element Barium (Ba) highlighted in a light gray color. The element symbol 'Ba' is printed in the center of the highlighted cell.

Gold

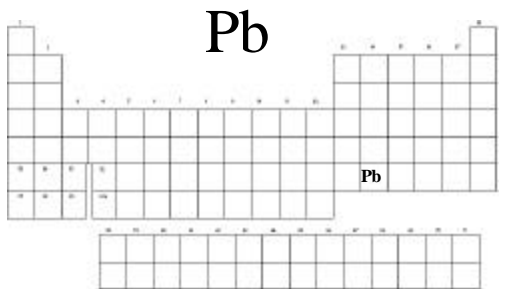

A periodic table of elements with the element Gold (Au) highlighted in a light blue color. The symbol 'Au' is written in a large font above the table, and a smaller 'Au' is placed in the cell corresponding to Gold's position in the periodic table.

Mercury

A periodic table of elements with the element Mercury (Hg) highlighted in a light blue color. The symbol 'Hg' is written in a large font above the table, and a smaller 'Hg' is placed in the cell corresponding to Mercury's position in the periodic table.

Lead

A periodic table of elements with the element Lead (Pb) highlighted in a light blue color. The symbol 'Pb' is written in a large font above the table, and a smaller 'Pb' is placed in the cell corresponding to Lead's position in the periodic table.
